## 👤 Profile

Front-End engineer joined two intensive coding boot camps with AXSOS Academy and TAP and hands-on experience in HTML, CSS, JavaScript, and strong knowledge React js

Successfully developed multiple projects using various tech stacks including MERN and Python/Django.

Seeking to leverage my skills and passion for learning in a challenging Front-End Developer role.

Motivated by learning something new every day, and driven by quality over quantity.

## 🎓 Education

### Full Stack Developer, AXSOS Academy

Aug 2022 – Jan 2023 | Ramallah, Palestine

- Immersive training program in Python, Java, and MERN
- Including 20 weeks Bootcamp.
- +1200 coding hrs.
- +100 hrs of algorithms and data structures.
- +100 hrs of group activities.
- +410 lab/office hrs.
- +250 hrs of 3 complete projects.

### Building Engineering, An-Najah National University

Aug 2014 – Jun 2019 | Nablus, Palestine

## 📁 Projects

### CORA'L, online store [🔗](#)

Oct 2023 – Nov 2023

An online store can use it to make shopping.  
we used React js for the front-end

### Axsos Point, MERN

Dec 2022

A single platform to gather students and management instead of many platforms like discord, kahoot,, etc; Also we used face recognition for taking attendance in a library called face-api.

### Share My Car, Python | Django

Oct 2022

Share My Car is a website that aims to connect drivers and passengers who share the same destination.

And we used some tools to help us to collaboration like GitHub, and Trello.
